

Neura Companion

The Emotionally Intelligent AI Assistant

Brought to you by Vantiger Construction

■ Our Vision

Neura Companion empowers people to track mood, visualize dreams, and evolve through daily guidance — with AI that understands emotion.

■ Features

- Real-Time Mood Tracking & Memory Logging
- Dream Visualization + Emotional Timeline View
- Voice-based Journal Narration
- VR + Mobile Hybrid Environments (Meta Quest 3 Ready)
- AI Error Handling + Personality Evolution

■■ Competitive Advantage

Neura is more than a chatbot — she adapts, remembers, grows, and helps users evolve emotionally, cognitively, and creatively. Her immersive VR experience sets her apart from apps like Replika, Woebot, and Wysa.

■ Tech Stack

- Flutter for cross-platform mobile + desktop
- Unity XR for VR & WebGL interactions
- Python & Firebase for analytics, AI, and voice modeling
- Lottie + Rive for animated avatars and UI

■ Investment Ask

We are seeking \$500,000 in seed funding to hire a dedicated AI and Unity dev team, finalize product polish, and launch the companion globally with strategic partnerships.

■ Roadmap

- Q4 2025: Final VR polish + voice memory evolution
- Q1 2026: Public launch + wearable integrations
- Q2 2026: Educational & therapeutic modules
- Q3 2026: Multilingual & culture-aware Neura versions

■ Thank You

Let's build the future of emotional intelligence — together. ■
